1705 EMERALD GREEN

5195 SNOW PEA

4915 SLASH PINE

New SCOFIELD Formula One Liquid Dye Concentrate is designed for use on ground and polished concrete installations. When added to acetone, it penetrates and colors interior concrete surfaces. After dilution, SCOFIELD Formula One Liquid Dye Concentrate is used in conjunction with SCOFIELD® Formula One™ Lithium Densifier and SCOFIELD® Formula One™ Finish Coat.

The color effects produced may differ significantly from that shown on the color chart. A representative test section should be prepared for each individual concrete surface prior to general application.
